

JONATHAN L. GOBOLI

OBJECTIVE

As an aspiring BS Information Systems student with a strong interest in frontend development, specializing in building static sites using HTML5, CSS3, Bootstrap 5, and SASS, I bring proficiency in designing simple UIs using Figma and experience in creating reactive web applications on the OutSystems low-code platform. While I currently possess a basic knowledge of JavaScript, I am actively pursuing opportunities to deepen my understanding and enhance my skills in this area. Eager to contribute effectively to a development team and grow within the dynamic web development ecosystem.

CERTIFICATE

DICT-WD003 Basic JavaScript for Web Development

DICT - Certificate of Completion
December 13, 2022
